

## EEA'S FETHERSTON CONNECTS WITH CALS

The ongoing working relationship between Energy Efficiency Arkansas (EEA) Facilitator John Fetherston and Mark Christ, the head of adult programming at the Central Arkansas Library System (CALS), began with a simple request. Fetherston contacted Christ about placing copies of EEA's booklet—*30 Simple Things You Can Do to Save Energy & Money*—in each of CALS's fifteen branch libraries.

Christ said, "I am always looking for possible programs to be presented at our libraries and John mentioned that he had several on conserving energy, which fit well with "CALS Goes Green," the system's ongoing efforts at conservation and sustainability. I invited John to attend one of our monthly in-service sessions for adult programmers so our folks could meet him and learn about his programs, but unfortunately the pandemic hit and the library closed down for several weeks. We all faced a learning curve as we pivoted toward virtual programming. But John stayed in touch with me, and we subsequently did a Zoom presentation of John's **30 Simple Things You Can Do to Save Energy & Money** program that was well-received and continues to get hits on the CALS YouTube channel. We still are not doing in-person programs, but John will present **Myths and Facts about Home Energy Efficiency** via Zoom at 6 p.m. on October 6 in celebration of National Energy Efficiency Day.
